Profile

Aspiring Frontend Developer with strong skills in HTML, CSS, JavaScript, React JS, and Tailwind CSS. Passionate about creating responsive and user-friendly web applications. Seeking opportunities to apply my knowledge and grow as a developer.

Areas of Expertise

React Js - Next Js - Typescript - Redux - Redux-toolkit - Material UI - Ant Design - Shadnc UI - Javascript - Tailwind - Bootstrap - Sass - Css - Html

Projects

Multilingual Online Store

- Created a responsive portfolio website with language selector supporting Uzbek, English, Russian and France
- Used React Select and React flags select package for the language selector and i18next for localization.

Login and Registration System

- Developed a full login and registration system with validation and error handling.
- Implemented token storage in localStorage and managed token responses on login.

Movie Search Application

- Developed a React application with search functionality for movies using a custom 'useFetch' hook.
- Implemented routes using react-router-dom and integrated a Loader component for loading states.

Personal Portfolio Website

- Built the website using React and Tailwind CSS for a modern, responsive design.
- Included sections for project showcases, skills, education, and contact information.
- Deployed the website using Vercel for easy access and sharing.

E-commerce Product Page

- Implemented a responsive layout using Tailwind CSS, ensuring a consistent experience on all devices.
- Utilized React state management for dynamic updates to product details, stock availability, and user reviews.
- Integrated a shopping cart feature, allowing users to add products and view cart items in real-time.
- Used Axios for API calls to fetch product data from a backend service.

Weather Forecast App

- Utilized the OpenWeatherMap API to fetch real-time weather data based on user input.
- Implemented search functionality using a custom hook to manage API requests and state management.
- Designed a responsive UI using Tailwind CSS, ensuring accessibility on both desktop and mobile devices.
- Included a feature to save favorite locations for quick access to weather updates.

Blog Platform

- Utilized the OpenWeatherMap API to fetch real-time weather data based on user input.
- Implemented user authentication using JWT to ensure secure access to features.
- Built CRUD functionality for managing blog posts with real-time updates on the UI.
- Utilized React Router for seamless navigation between different sections of the application (home, create post, edit post).
- Styled the application with Tailwind CSS, focusing on readability and user engagement.

Online Courses & Certifications

- Certified Frontend Developer (September. 2024) - [Najot Ta'lim](#)

Education

Patent Science *National University of Uzbekistan named after Mirzo Ulugbek* **Tashkent, Uzbekistan** 2022-2026

Relevant Courses: Introduction to Intellectual Property Law, Patent Law and Policy, Patent Drafting and Prosecution, Patent Searching and Analysis, Patent Litigation and Dispute Resolution, International Patent Law, Ethics in Intellectual Property, Commercialization of Intellectual Property, Technology Transfer and Licensing, Emerging Issues in Patent Law.

Skills

- **Frontend Development:** HTML5, CSS3, SASS, JavaScript (ES6+), TypeScript, React.js, Next.js
- **UI Frameworks & Libraries:** Bootstrap, Tailwind CSS, Material UI, Ant Design, Shadcn UI
- **Responsive Design:** Media Queries, Mobile-First Design, Cross-Browser Compatibility
- **State Management:** React Context API, Redux (if applicable)
- **API Integration:** RESTful APIs, Axios, Fetch API
- **Version Control:** Git, GitHub
- **Localization:** i18next, React-i18next
- **Development Tools:** Visual Studio Code, npm/yarn, Postman (for API testing)
- **Soft Skills:** Problem-Solving, Team Collaboration, Adaptability and Continuous Learning

Languages

- **Uzbek** [Native]
- **English** [Intermediate] - B2
- **Russian** [Basic] - Learning
